Corporation Masquerading as Government

Dear Mr Chief Scientist/Title/Corporation/Fiction/Faceless Entity

I appear to be writing to 'the office of;' as opposed to a flesh and blood human being, so in order to be recognized I assume that you see me as a corporate entity as well.

Question: Is this review serious?

Can I imagine that you have not googled this and seen the direct, first hand evidence of

destruction, poisoning, death of people and the planet from this activity in other parts of the world?

If not then I ask you to google 'effects of CSG mining in the USA'. Do this before Ms Roxon and co censor the free Internet, and Ms Gillard censors free speech.

Is the intention of this review to obfuscate these real and documented effects by conducting this review and so doing being able to manipulate the results in order to justify the govts position?

The feeling amongst my tribe is that Government is no longer serving the people, it is serving itself and its corporate interests. The people are aware of this.

So beware, your time is nigh.

Look after the planet, look after the people. Do no harm. Ask yourself this simple question before you make any decisions. Will this harm people, will this harm the earth. If the answer is yes, then no buts, DON'T DO IT!

You will be held personally accountable for your stance on this issue. Be prepared to pay the price.

Love and Blessings

Tesla
