History:

This message has been replied to and forwarded .

Attention: Ms Mary O'Kane

We are members of the Caroon Coal Action Group and we are also landholders on the Liverpool Plains. We are writing to you in support of the submission that you would have already received from Mrs Rosemary Nankivell Coal Seam gas Chairman of the Caroon Coal Action Group.

We are very concerned about the impact of the coal seam gas industry will have upon the farmers of the Liverpool Plains specifically:

The depletion along with contamination of water resources. Once this occurs it will be unfixable.

The risks and the unknowns of the coal seam gas industry alone causes great concern.

Subsidence damage to the rich soils of the Liverpool Plains - soils which are recognized as such Nationally and Internationally.

Areas such as the Liverpool Plains should not be exposed to an industry that presents specific risks.

Regards,

Allan & Marie Grant
