Subject: We entreat you

To: troy.deighton@chiefscientist.nsw.gov.au

Dear Ms. Mary O'Kane, Mr. Troy Deighton and staff,

I am forwarding the following link to you and entreat you to consider the prospects that it unveils, for the long term residents of the PELS in NSW that will have to deal with this on the frontline, literally.

Especially the PELS in North West NSW 238 and others in which the fast tracking before the true intent of the miners to drill thousand upon thousand of wells is lost under their gentle entreaty of "just a few, at this

phase"

Are we really and honestly, on the eve of the 100th anniversary of the ANZACS, going to give up on that Aussie temerity and love of backing, the dinky di, over the self-serving back room wheeler dealers?

Who do we have to turn to?

If not the Chief Scientist of NSW ?

<http://blogs.edf.org/energyexchange/2013/10/16/new-study-launches-in-series-evaluating-methane-across-the-natural-gas-system/#more-5214>

We entreat you to impose a Moratorium on the progress of any and all coal seam gas exploration or production of any exploration/ pilot wells in the Pilliga and surrounds, till every loose woollen thread is tied off.

As we speak and what we all know is, once the Trojan horse is wheeled in, the complete overtaking will follow. That horse is breaking into a canter right now toward the Pilliga.

Every government department involved, is tuned into and directed by the gas rush of quick fixes but the long term detrimental effects now emerging in the USA are here for the looking.

The sham 'protections' are not laws but guidelines in NSW and Federally. For whose benefit?

Please read the link and stand up for the long haul.

Thankyou and regard

On behalf of the concerned, informed and importantly the uninformed of the North West of NSW.

Victoria Hamilton
