## **The NSW Office of the Chief Scientist & Engineer**

I'm not quite sure what or whom I'm writing to, as you and the Government attempt to escape liability in tort by attempting to hide behind your corporate identify. No doubt you also hold a law degree. However, please be aware that everyone is equal before the law, and any act that you perform that aids and abets a crime will cause the people of the commonwealth to hold you to account for an act of treason against the people.

- Is there not:
  - An overwhelming amount of world evidence regarding the effects of CSG mining?
  - Evidence which shows gas and chemicals in the water supply?
  - Evidence of un-sustainability?
  - Evidence that csg mining destroys the land therefore the environment?
  - Evidence that poison destroys human health?
- Is your office simply mocking the general population when every tier of government has usually ignored the will of the people about an endless amount of issues for a long time period?
- Do you support the United Nations Agenda 21 program which is a depopulation program?
- Are you a Freemason, Knight of Malta, Catholic, Jesuit, Zionist or other secret society member?
- Are you prepared to go to jail if you aid and abet a crime of sedition against the people of the commonwealth?

The battle lines are forming across the country, so my last question is:

WHOSE SIDE ARE YOU ON?

Blessings and peace
