History: This message has been replied to and forwarded.

Attention to the Chief Scientist

As a resident of the Hunter Valley I am EXTREMRLY concerned of the Known and importantly the Unknown impacts of coal seam gas activities on My Families health together with the rest of the community and the environment.

Also as a business owner we rely upon Tourism for our livelihood, Where are we to live when the water quality and is such that it ruins the vegetation, crops, creeks and species of the natural wildlife ????????????????????

Importantly: Would you accept COAL SEAM GAS MINING in a street near where you and your family live ????????????????????

I personal request that you the Chief Scientist to be reasonable and seek out or at least commission truly independent sources of information in order to develop meaningful fact sheets AND DO NOT rely upon industry information

Subject: Chief Scientist wants your views on the health and environmental impacts of coal seam gas!

Please mention in your submission:

The NSW Chief Scientist will report by July 2013, so it is important that you write to the Chief Scientist now. Email your submissions to: csg.review@chiefscientist.nsw.gov.audeadline for submissions is 26 April 2013

I encourage you to make a submission because the Government will put weight on what the Chief Scientist reports.
