Re. call for public submissions on c.s.g.(fracking)

With regards to coal seam fracturing for gas or oil, i would like it to be known that i am absolutely & completely opposed to this occurring in any way, shape or form in this country, or any other for that matter. If you have any moral fibre & wish to represent your fellow countrymen & the land on which we live you will denounce & suspend for ever this vile & deadly practice.

By taking a short look at what has occurred in the U.S.A. it is easy to make a correct & humane decision. Many people have grave health issues, only since fracking started in their near area. Water courses, wells, flora & fauna have been devastated & are unlikely to recover—ever! The chemicals used in the process are dangerous & are not recovered. The venting from the thousands of pumping terminals is not filtered. The amount of diesel fuel used to run these pumps (24/7) is phenomenal. It seems to me that this is only a benefit to oil/gas companys & their share—holder corporations.

What i find most astounding, is that the federal politicians have placed a moratorium, not on fracking but on Not fracking!!! I gather until it is proven that it causes a problem. If you do not look at the sky you will not see a cloud! ie. if you do not look at csg problems you will not see them.

I hope that this is clear enough & that you will indeed avail yourself of the information that has shown this practice of fracking to be the disaster it has been & if left to continue, will continue to be.  
yours sincerely
