

**Chief Scientist wants your views on the health and environmental impacts
of coal seam gas!**

Dear Sir

With absolute respect for your understanding of our environment
There is no need for coal seam gas.
We do not need our lands to destroyed, our oceans to be polluted by the
export or piping
we do not need coal to be burned anymore. Coal seam gas poisons the water
and there
is absolute fact that peoples' health is affected negatively.

We need energy? we need power?
