Dear Chief scientist, With regard to CSG mining in the Gloucester basin . We are gravely concerned with the impact of coal seam gas activities , on the health and wellbeing of the human and animal population of the region as well as the environmental impact on such a productive, pristine and picturesque area of the state .

We feel it is imperative that the study is conducted by an independent source , free of any mining company interests, in order to develop fact sheets without bias .

Regards, Daphne & Peter Mitchell
